

Adnan Al Armouti

New York, NY | aa2546@cornell.edu | adnan-armouti.github.io | [Google Scholar](#) | [GitHub](#)

Interests: 3D Gaussian splatting, differentiable rendering, inverse simulation, sim-to-real, neural implicit representations, multimodal sensing, computational imaging, medical imaging

Education

Ph.D. Candidate in Computer Science, Cornell University Aug 2023–Present
Advisor: Rajalakshmi Nandakumar GPA: 4.0/4.0
M.S., Electrical and Computer Engineering, UCLA Sep 2021–Jun 2023
Advisor: Achuta Kadambi GPA: 4.0/4.0
Thesis: “Fusing Light and Radio Signals for More Accurate and Equitable Blood Flow Estimation”
B.S., Electrical Engineering; B.A., Economics, UCLA Sep 2017–Jun 2021

Current Research

Physics-Based Differentiable Simulation for Millimeter-Wave Radar Perception

Committee: Rajalakshmi Nandakumar (Chair), Steve Marschner, Andrew Owens, Alyosha Molnar

- I develop explicit, physics-based differentiable renderers for mmWave radar that fit real captures via material and surface normal estimation [1, 2].
- Explicit modeling of independent scene and sensor representations enables scene- and sensor-level editing to solve inverse problems such as 2D-to-3D lifting [2], super-resolution [2], and novel view synthesis [1].

Research Experience

Wireless Systems Lab, Cornell Tech, New York, NY

Aug 2023–Present

PI: Rajalakshmi Nandakumar

- Built mmIR, an open-source differentiable FMCW radar inverse renderer with multi-bounce propagation, polarization, and diffraction; 0.914 range–azimuth correlation on 13 real scenes, vs. 0.307 for Sionna-RT [2].
- Built 3DPS, the first differentiable point renderer for radar novel view synthesis, producing ADC, range profiles, and range–azimuth maps from one model; $1.7\text{--}5.2\times$ over optical novel-view-synthesis baselines [1].
- Contributed to mmFHE, the first mmWave sensing pipeline (signal processing and ML inference) run end to end under fully homomorphic encryption [4].

Visual Machines Group, University of California, Los Angeles

Sep 2020–Jun 2023

PI: Achuta Kadambi

- Led a successful \$1M DARPA grant proposal for contactless, equitable health sensing.
- Co-led camera–radar fusion for skin-tone-equitable remote plethysmography [3].
- Co-implemented a neural implicit decomposition for heart-rate estimation on out-of-distribution subjects [5], and contributed to thermal and radar sleep-apnea monitoring [6].

Open-Source Contributions

3DPS (coming soon). Differentiable point splatting for radar novel view synthesis [1].

mmIR ([project page](#)). Differentiable FMCW radar inverse renderer [2].

EquiPleth ([GitHub](#)). Camera–radar fusion for equitable plethysmography [3].

FastImplicitPleth ([GitHub](#)). Implicit neural models for heart rate from video [5].

NonContactApneaDetection ([GitHub](#)). Thermal and radar sleep-apnea detection [6].

Presentations

ECCV 2026, presenter (mmIR [2]), Malmö, Sweden

Sep 2026

SIGGRAPH 2022, poster co-presenter, Vancouver, BC

Aug 2022

ICCP 2022, poster co-presenter, Pasadena, CA

Aug 2022

Teaching

Teaching Assistant, Cornell Tech, Cornell University

Aug 2023–Present

- CS 5785 “Applied Machine Learning,” Prof. Kyra Gan (Fall 2023, Fall 2024, Fall 2025, Fall 2026)
- CS 5788 “Introduction to Generative Models,” Prof. Andrew Owens (Spring 2026)
- INFO 5368 “Practical Applications in Machine Learning,” Prof. Angelique Taylor (Spring 2025, Spring 2026)

Awards

NVIDIA Academic Grant	Jun 2026
UCLA ECE Outstanding Master of Science Student Award	Jun 2023
UCLA ECE Distinguished Master’s Thesis Research Award	May 2023
UCLA ECE VMG GSR Scholarship	Jan 2022
NSF REU Fellowship	Jun 2021
Intel URP Scholarship	Sep 2020
SRC URP Scholarship	Jun 2020
UCLA ECE Dean’s Honors List	2020, 2021

Service

Reviewer, NeurIPS 2026	2026
Research Mentor, UCLA ACM AI Undergraduate Research Program	Sep 2022–Jun 2023
Mentor, UCLA ECE VMG Mentoring Program	Sep 2022–Jun 2023

Skills: Python, C/C++, CUDA, MATLAB; PyTorch, PyTorch3D, JAX, Mitsuba 3, Dr.Jit, Slang, Open3D; FMCW radar signal processing, TDM MIMO; TI mmWave radars
